OBJECTIVE

Software Engineering undergraduate with a growing interest in **AI** and modern software development, currently building hands-on experience through personal projects, cloud deployment, and coursework. Eager to learn from an experienced team and contribute wherever useful during an internship.

EDUCATION

Ghulam Ishaq Khan Institute of Engineering Sciences and Technology (GIKI) Topi, Pakistan
BS in Software Engineering; CGPA: 3.1/4.0 Sept 2024 – May 2028
– Top University of Pakistan
– **Relevant Coursework:** Computing & AI (A), Data Structures & Algorithms (A), Database Management Systems (A), DevOps Lab (A-), Object Oriented Programming (A-), Software Engineering, Software Requirement Engineering (B+)

EXPERIENCE

Software Engineering Intern June 2025 – Aug 2025
Systems Limited Web Development Division
– Contributed to web development projects during a full-time internship, gaining exposure to professional software engineering workflows, responsive layouts, and full-stack development practices.
– Learned and applied React, Next.js, and Tailwind CSS under instructor guidance, building UI components as part of the internship's structured learning track.

PROJECTS

Al Juthur (Islamic Learning Platform) | *React, Next.js, LLM APIs, Vector Databases, Python (In Progress)* 2026
– Integrated 120+ classical and modern Tafsir sources and 8+ classical Arabic lexicons, with a working AI translation model powered by the Gemini API for real-time scholarly text translation.
– Designed the underlying PostgreSQL schema and ETL pipeline for per-ayah Tafsir and word-level lexicon data, and currently implementing a Retrieval-Augmented Generation (RAG) layer for contextual question-answering.

PinBoard [Live] | *Next.js, PostgreSQL, Prisma ORM, Docker, AWS EC2, GitHub Actions* 2025
– Developed a full-stack picture-sharing platform using Next.js 14 API routes and Neon PostgreSQL, writing schema relations to handle boards, pins, and users.
– Containerized the application using Docker, deployed it to an AWS EC2 instance, and established a CI/CD build pipeline using GitHub Actions to automate builds and migrations on every commit.

Quran & Hadith Lookup Shortcuts [Live] | *Python, Flask, AutoHotkey* 2026
– Built a cross-platform (Windows/Mac) shortcut tool that autofills any Quran verse or Hadith reference (e.g. 33:44) into its full text on the fly, covering the entire Quran and major Hadith collections.

Awakening (Mental Health & Habit Tracker App) | *FlutterFlow, Firebase, Quote API, UI/UX Design* 2023
– Engineered a mobile therapy application featuring habit tracking, daily task lists, and real-time user chat modules.
– Integrated Firebase Auth, Cloud Firestore, and cloud storage to support 30–40 active users during its run.

My Portfolio [Live] | *React, React Three Fiber, GSAP, Tailwind CSS* 2026
– Designed and built a personal 3D portfolio site with scroll-triggered animated figures using React Three Fiber and GSAP.

Interactive 3D Web Experiences | *React, React Three Fiber, GSAP, ScrollTrigger, Three.js* 2025
– Designed and deployed highly animated, responsive 3D sites (Juice Zone and PsyConnect) utilizing GLTF mesh models, shaders, and scroll-triggers.

CERTIFICATIONS

Retrieval-Augmented Generation (RAG) Specialization – Coursera
Three.js & React Three Fiber Certification – Three.js Journey

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, SQL
DevOps/Cloud: Docker, AWS (EC2), GitHub Actions (CI/CD), Linux/Ubuntu, Git/GitHub
Databases & AI: PostgreSQL, MongoDB, Firebase, Prisma ORM, RAG Pipelines, Vector Databases
Frameworks/Tools: Next.js, React, React Three Fiber, GSAP, Tailwind CSS, FlutterFlow
